

MS. YUHAN YANG

PROFILE

Ms. Yang's expertise encompasses curtain wall, window wall, and storefront engineering, as well as manufacturing and construction. She also has extensive experience in the commissioning, delegated design, inspection and investigation of building facades, exterior wall systems, fenestration systems, and enclosure assemblies, often leading to the development and oversight of repair designs. Her in-depth knowledge of facade, window, curtain wall, and overall enclosure performance has equipped her with significant expertise in new enclosure consulting, commissioning, and construction projects. Her work includes curtain wall systems, aluminum window systems, building facade cladding systems, and enclosure assemblies, with building types ranging from high-rise residential and office buildings to institutions, healthcare facilities, and historic structures.

EXPERIENCE

Startesta, LLC – Project Executive

2024-Present
